Summary

Full-stack software developer with a 3-year Advanced Diploma in Software Development and Network Engineering, experienced in delivering Java and Spring Boot applications backed by REST APIs, authentication, and real-time communication. Designs, deploys, and operates software in production, including a self-hosted web app used daily by staff and a Linux home server running multiple live services. Combines backend depth with Android development and practical infrastructure experience for a junior software developer role.

Skills

Languages: Java, Kotlin, JavaScript, TypeScript, Python, SQL, C, C#
Backend: Spring Boot, Spring MVC, Spring Security, REST APIs, Microservices, JWT, WebSockets
Frontend: React, Angular, Thymeleaf, Jetpack Compose
Mobile: Android (Jetpack Compose, ML Kit)
Databases: MySQL, MariaDB, Room (SQLite)
Cloud & DevOps: AWS (EC2, S3, IAM), Docker, Linux/UNIX, Cloudflare Tunnels
Tools: Git, GitHub, Maven, Gradle, Postman, IntelliJ IDEA, VS Code

Experience

Full-Stack Developer Intern Jan 2026 – May 2026
Samskrita Bharati *Mississauga, ON (Hybrid)*

- Shipped updates and fixes across a nonprofit's Canada-chapter website (JavaScript, HTML, CSS), improving content accuracy and page consistency.
- Collaborated with a 6+ member distributed volunteer team, coordinating changes through Git and GitHub and reviewing peers' updates before release.

Assistant Manager Mar 2023 – Present
Petro-Canada *Brampton, ON*

- Identified a recurring loss from expired stock, then independently designed, deployed, and now operate an internal expiry-tracking web app (Spring Boot; HTML/CSS/JS) used daily by 7–8 staff, replacing a manual logbook and cutting missed-expiry write-offs by 80%.
- Earned two promotions from attendant to assistant manager; run end-of-shift cash reconciliation and inventory for a high-traffic location while coordinating shift staffing, staff onboarding, and issue escalation during peak hours.

Projects

Expiry Tracker | *Spring Boot, REST, HTML/CSS/JS, Linux* | expiry.vrajcloud.dev (Live)

- Designed a Spring Boot REST backend and lightweight HTML/CSS/JS frontend; own full lifecycle from development through deployment to operations.
- Host it in production on a self-managed Linux home server exposing three live subdomains via Cloudflare Tunnels, with 3+ months of uninterrupted uptime.

News AI – Smart Email News Aggregator | *Spring Boot, Gemini AI, JavaMail* | api.vrajcloud.dev (Live)

- Engineered a Spring Boot backend aggregating articles from multiple external APIs with Gemini-based summarization.
- Automated scheduled email delivery of curated news digests on a daily cadence.

InstiManage – Space & Resource Management (Capstone) | *Spring Boot, React, MySQL, Docker, YOLO*

- Developed REST APIs with JWT authentication and role-based access control for booking rooms, lockers, and equipment.
- Implemented real-time chat and request workflows over WebSockets and structured backend services around clean architecture, contributing to Agile sprints and code reviews in a 4-person team.

Education

Sheridan College Dec 2025
Advanced Diploma in Software Development and Network Engineering – GPA: 3.44 / 4.00 *Oakville, ON*

- **Relevant Coursework:** Advanced Java Frameworks, Enterprise Java Development, Cloud Architecting, Mobile Web-Based App Development, Capstone Project
